聯康生物科技集團有限公司***Uni-Bio Science Group Garners Prize at Hong Kong Business High Flyers Awards**
-- Testimony of Its Industry Leadership, Production Innovation and Operational Excellence

(Hong Kong, 20 January 2016) – **Uni-Bio Science Group Limited** (“Uni-Bio” or the “Group”; HKEx code: 690) has been honored at the “2015 Hong Kong Business (“HKB”) High Flyers Awards” in the Innovative Healthcare Solutions category. The accolade is strong testimony for the Group’s achievements in various areas including a track record of leadership in the field, continuous innovation of its products, as well as its demonstrated commitment to excellence in both operations and customer focus. This is Uni-Bio’s third prestigious corporate award following the HKB Listed Companies Awards and Hong Kong Investor Relations Association’s Investor Relations Awards earned over the past year.

Mr. Kingsley Leung, Executive Director of Uni-Bio Science Group, said, *“We are pleased to be honored at the HKB High Flyers Awards in the Innovative Healthcare Solutions category, a great start to the new year. Based on a solid foundation of and a special focus on diabetes-related treatment, we strive our utmost to offer truly innovative products to patients which cater to their real needs. In the past year, apart from our ongoing R&D effort, we have actively formed partnerships aimed at enhancing our current product portfolio and accelerating our business growth. Emphasizing product quality and manufacturing capacity, we have stepped up efforts to upgrade our manufacturing facilities so both of our plants in Shenzhen and Beijing comply with the latest cGMPⁱ standards. We are gratified that our achievements in these areas have been widely recognized and winning – the third award within a short 12 month period is a strong affirmation of our past and upcoming work. In the future, we will continue to pursue excellence through offering more efficacious treatment options for our targeted patients, in addition to further enhancing the Uni-Bio brand.”*

The Group is focused on the development of novel treatments addressing the therapeutic areas of diabetes, ophthalmology and dermatology.

About Hong Kong Business High Flyers Awards

Organized by *Hong Kong Business* since 2004, The Hong Kong Business High Flyers Awards recognizes the most outstanding companies in Hong Kong which are able to demonstrate excellence within their respective industry. Criteria include track record of leadership in the field, continual innovation on both product and service delivery, proven commitment to excellence in both operations and customer focus, effectiveness and dynamism, in addition to strong brand leadership and marketing. Companies with the best performance according to these criteria would be selected by the judging committee for the awards.
